

FOR CORPORATE RETAILERS AND PORTALS

We offer a cost-effective payment gateway that extends your present Point-of-Sale or Payment system to accept mATM payments.

MBIZ PAYMENT GATEWAY

Most retailers today accept some forms of electronic payments (payment by credit cards and debit cards) in addition to the traditional cash payments. eMobile MBiz Payment Gateway offers an opportunity for retailers to extend their electronic payment facility to enable mobile users who do not have credit cards to pay electronically using mobile payments. Payments are debited from the users' bank account or mobile wallet, and credited to the retailers' account online and in real-time.

eMobile offers MBiz Payment Gateway as a turnkey solution in partnership with mATM Member Banks as part of the banks' merchant banking facility for accepting mobile payments from mATM users.
