

FOR BUSINESS USERS

As mATM Merchant Member, turn your mobile phone into a Point of Sales device, stop wasting time queuing in the bank and increase your sales revenue.

mATM Services links any of your existing merchant accounts at mATM member banks to your mobile phone, enabling you to conduct business at any time, from anywhere in the world.

The following are some of the facilities that will be available to you upon becoming an mATM Merchant:

1. You can use your mobile phone as a payment terminal to capture and process cash and credit card payments from your clients from anywhere at any time. This eliminates the need for a special payment terminal or a telephone landline to connect to a payment terminal; it will already be included in your MPOS-equipped mobile phone, resulting in cost savings.
2. You can offer your clients cash withdrawals to reduce some of your excess cash. The bank will credit the amount of cash you dispense to your clients directly into your account, as well as an applicable cash-dispensing fee.
3. You can use your mobile phone to top up customer's mobile phone electronically. The benefit is: your customer will pay the top up cost at retail price, whereas the bank will debit your bank account for the amount agreed by the Telco
4. You may generate additional service income by offering your clients mATM remittance service to send/receive electronic cash. Neither the sender nor the beneficiary needs to have any bank account to use mATM remittance service.
5. In addition, you may also enjoy all the mATM service benefits as an mATM user.
6. Best of all, you don't need to have a mobile phone with special features to become an mATM Merchant. When you register as an mATM Merchant, eMobile will provide you with an MPOS SIM card to replace your existing SIM card. With the MPOS SIM card, mATM Merchant Services will be ready at your fingertips.
